

Standard for administrative data management

University Policy 7100, the Administrative Data Management and Access Policy

(www.policies.vt.edu/7100.pdf) vests responsibilities in the university's chief information officer, data trustees, data stewards, several supportive roles, the General Systems Management Team, and all data users. The purpose of this standard is to specify the university personnel who occupy the roles of data trustees and data stewards, so that members of the university community who may have a need to access data, make corrections, or better understand data definitions and data sensitivity will have appropriate contact information.

This standard covers the described data in all forms, whether electronic or paper, and whether the data are discrete elements or narrative documents. Although the standard is not limited to data stored electronically, many university data systems of record are electronic databases, including Banner, PeopleAdmin, HokieMart, and others.

Maintenance of this standard is assigned to the Vice President for Information Technology and Chief Information Officer, in collaboration with all university vice presidents. The standard will be reviewed annually. Changes in data administrators between annual reviews may be posted separately on the standard website—www.it.vt.edu/administration/policies.html.

The designations of responsibility in the standard generally mirror that of the university organization chart, since the managerial span of control is required to exercise the data administration responsibilities. There are instances, however, where authority is delegated specifically for data administration outside the organizational hierarchy, or where shared authority is required for data administration.

Freedom of Information Act (FOIA) requests are coordinated by Tracy Vosburgh, Senior Associate Vice President for University Relations. (See www.policies.vt.edu/FOIAa.php.) Nothing in this standard should be construed to override the FOIA policy. Similarly, this standard is consistent with other, related policies specified in Section 4, "References."

1. Data administration roles reviewed

For a complete list and description of data management roles, see Policy 7100.

1.1 Data trustees

Data trustees are senior university officials, typically at the level of a vice president, who have planning and policy-making responsibilities for university data. Data trustees are generally designated by the domain of a vice president's span of control.

1.2 Data stewards

Data stewards are assigned by data trustees. Data stewards classify data according to Policy 7100 for access and sensitivity, define and monitor data quality, and craft and communicate data definitions. With delegated authority from data trustees, data stewards are the primary contact points for members of the university community who may have concerns with data. Any issues unresolved at this level may be taken to the respective data trustee.

1.3 Other roles

Data experts and data managers are specified by Policy 7100 and typically have internal office responsibilities under the direction of a data steward. The few who are listed in this standard reflect areas where they are the key contact personnel frequently needed by other university operations or offices. These data experts may be important sources of information about data definitions, for example. For additional data experts and data managers, contact the appropriate data steward.

2. Data domains

University data include information about the university's activities—for example, budgets, job descriptions, curricula. University data also include data as applied to specific individual people or external organizations—such as purchases from a specific vendor, tax withholding of a specific employee, the major of a particular student. In some situations, there may be different stewards assigned to similar data types if they apply differently—for example, the courses within a major are curricular decisions of the university, while a particular student's major is about a specific individual.

The following categories are the primary data domains of the university. Each domain lists one or more data trustee. The listed data stewards are not intended to be a comprehensive list, but rather a list of the most commonly needed data stewards for purposes of requesting access, handling requests for data corrections, and understanding data definitions, classification, and sensitivity. Key words are included in some sections to facilitate searching. Key words are not intended to be a comprehensive listing of all data.

2.1 Commonly used domains

Questions about data integrity, data accuracy, data definitions, or other matters may arise in many situations. One purpose of this document is to provide direction on how individuals may find answers to their questions and concerns. Because of their central nature, some data domains are more often involved. As a convenience, stewards for these more commonly used domains are listed here:

Students' personal or demographic information and students' academic records: Rick Sparks University Registrar

(See sections 2.2.3.3 and 2.7.6)

Employees' personal or demographic information: Lisa Wilkes, Associate Vice President for Administration

(See sections 2.2.3.4)

Employment information about staff and AP faculty: Lisa Wilkes, Associate Vice President for Administration

(See sections 2.5.1)

Employment information specific to teaching and research faculty: Jack Finney, Vice Provost for Faculty Affairs

(See sections 2.5.2)

Data on financial transactions: Ken Miller, Assistant Vice President for Finance and University Controller

(See section 2.4 below)

2.2 Entity description domain

Entity description data refers to basic descriptors of people—students, faculty and staff, donors, alumni, friends; and of specific external organizations—vendor companies, granting agencies, organizational or corporate donors. Contact information supplied by the individual or organization (addresses, phone numbers), names and other identifiers, and personal information such as date of birth, gender, citizenship, and veteran status are examples.

2.2.1. Data definitions subdomain for entities

One set of responsibilities for identity and demographic data pertains to the definitions of information and data quality that apply to all people and organizations. For example, common codes and labels are attached to different types of postal addresses for people and organizations. To the extent possible, these codes and labels should be consistent across all the demographic data subdomains. Where consistency is not reasonable, there should be mapping of other definitions or transformations to the enterprise resource system codes and labels (e.g., Banner).

These trustee responsibilities are assigned to the Vice President for Information Technology and Chief Information Officer.

Keywords: names, addresses, phone numbers, date of birth, Social Security number, citizenship, visa type, veteran's status, definitions, codes, labels

Data trustee	Scott F. Midkiff, Vice President for Information Technology and Chief Information Officer
Data steward	Karen Herrington, Director, Identity Strategy Administration

2.2.2. Non person entity subdomain

Non person entities have descriptive information—including names, addresses, other contact information, tax identification numbers, along with information on parent organizations. Virginia Tech has multiple potential relationships with these non-person entities ranging from vendors through donors to agencies granting research funding. The basic information is primarily managed through the auspices of the Procurement Department, and in University Advancement. Policy management of non-person information is assigned to two trustees to be sure that the interests of these varied relationships are met.

Keywords: corporations, government agencies, not-for-profit organizations, vendors

Data trustees	Charles Phlegar, Vice President for Advancement M. Dwight Shelton, Vice President for Finance and Chief Financial Officer
Data experts	Bonnie Sutphin, Associate Director for Operations, Procurement Department Karina Martin, Director of Gift Accounting and Information Systems, University Advancement

2.2.3. Person entity subdomain

Person entity descriptive information is managed according to the relationship that the person has with the university - students, employees, alumni, donors, or others. Particularly sensitive types of information have overarching data administration responsibilities designated by policy.

2.2.3.1. *Social Security numbers*

According to Policy 1060, approval of the collection and use of Social Security numbers (SSNs) resides with the Vice President for Finance (M. Dwight Shelton). Additional data administration is provided by the data trustees and stewards with responsibilities for the persons with the number. The Vice President for Information Technology has oversight responsibilities for the storage of the SSN in enterprise databases.

2.2.3.2. *Additional nonpublic personal financial information*

Nonpublic personal financial information includes any record containing nonpublic personal financial information provided by students or others in order to obtain a financial product or service from the university. Such records include loan applications, bank and credit card numbers, account histories, income tax returns, credit reports and other related customer information. The University Bursar (Melinda West) is the Program Officer for nonpublic personal financial information and must be consulted for any proposed new uses for such information.

This standard is a part of the implementation of University Policy 7100

2.2.3.3. *Current, prospective, and former students*

The Family and Educational Rights and Privacy Act covers information related to individuals who are in attendance at the university. Basic demographic information about former students is under the same trustee and steward as information about current students. (See Section 2.2.3.6 on alumni). Any individuals on student-wage employment or on any form of graduate assistantship are employed *because* of their student status, and therefore in this same relationship category..

Prospective students are handled by the respective admissions offices. Prospective students are those who have applied for admission but have not yet accepted the university's offer of admission.

Keywords: student, applicants, recruits, work-study, graduate assistantships, international, immigration

Data trustee
and steward of
demographic
data on current
and former
students

Wanda Hankins Dean, Vice Provost for Enrollment and Degree Management

Data stewards
of
demographic
data regarding
prospective
students

Mildred Johnson, Associate Vice Provost, Enrollment Management and Director,
Undergraduate Admissions
Karen DePauw, Vice President and Dean for Graduate Education
Cyril R. Clarke, Dean, Virginia-Maryland Regional College of Veterinary Medicine
Alan Grant, Dean, College of Agriculture and Life Sciences (for the Agricultural
Technology Program)

2.2.3.4. *Current and former employees, including retirees*

All employees, with the exception of individuals in jobs *because* they are students, fall to Human Resources for management of their demographic information that is concurrent with their employment. (For student wage employees or graduate assistants, see section 2.2.3.3 above). This category also includes employees in non student wage jobs who may be pursuing academic classes at this university. The same data administration applies to demographic data about prospective employees.

Keywords: employee, faculty, staff, emergency hire, regular wage, applicants, recruits, non-student wage, international, immigration

Data trustee

Sherwood Wilson, Vice President for Administration

Data steward

Lisa Wilkes, Associate Vice President for Administration

Data expert

Cathy Petry, Director of Human Resources Support Services

2.2.3.5. *Non paid affiliates*

The term “non paid affiliates” refers to a range of relationships in which individuals have a relationship to the university but do not fit readily into other categories. Information maintained about these individuals is used for the purposes of tracking activities, providing appropriate contact information, authorizing agreed-upon special use of university resources, and related purposes. Responsibility is shared between Human Resources and Identity Management Services.

For individuals with "employee-like" responsibilities, primary data administration is through Human Resources. These include individuals paid by sources other than the university who teach students, supervise Virginia Tech employees, and engage in related duties.

Data trustee	Sherwood Wilson, Vice President for Administration
Data steward	Lisa Wilkes, Associate Vice President for Administration
Data expert	Cathy Petry, Director of Human Resources Support Services

For others, primary data administration is through the Division of Information Technology.

Data trustee:	Scott F. Midkiff, Vice President for Information Technology and Chief Information Officer
Data steward	Karen Herrington, Director, Identity Strategy Administration

2.2.3.6. *Alumni*

The distinction between “alumni” and “former students” is, in part, based on an alumni’s on-going relationship with the university. Management of demographic data that reflects an individual’s time in attendance at Virginia Tech is assigned to the student category (2.2.3.3). Data administration of information reflecting alumni activities subsequent to enrollment is assigned to the alumni relations area.

Data trustee	Charles Phlegar, Vice President for Advancement
Data steward	Matthew Winston, Senior Associate Vice President for Alumni Relations

2.2.3.7. *Donors and friends*

This category applies to the demographic data of all constituents who are donors to the university as well as to potential donors or prospects.

Keywords: donors, contributors, parents, friends

Data trustee	Charles Phlegar, Vice President for Advancement
Data steward	Rhonda Arsenaault, Associate Vice President for Advancement Services

2.2.3.8. *Other persons*

While vendors are often non persons (see section 2.2.2), individual persons may also be vendors. Similarly, some individuals who are not students, employees, or alumni, may owe the university money for library fines, parking fines, or other reasons. The data expert in the Procurement Department manages this data.

Data trustee	M. Dwight Shelton, Vice President for Finance and Chief Financial Officer
Data expert	Bonnie Sutphin, Associate Director for Operations, Procurement Department

2.2.3.9. *Multiple relationships*

Individuals may have multiple ways of connecting with the university. For the purposes of managing demographic data, the definitions and hierarchical precedence below applies. As an example, someone who graduated from Virginia Tech then later came to work at the university would, at the time of their employment, be a former student, an alum, and an employee. This person's demographic data would be handled by the human resources area, rather than either the student or the alumni area. Or, demographic data for a retiree who enrolled in a course would be handled as a current student during the period of enrollment.

1. Current employees, including salaried and non student-wage employees who may be enrolled in one or more courses, but excluding student wage employees
2. Current students, including students who may hold student wage jobs
3. Non paid affiliates
4. Retirees
5. Alumni
6. Donors or friends
7. Prospective employees
8. Prospective students
9. Other persons (person vendors, persons with accounts receivable, etc.)
10. Former students (not graduates)
11. Former employees

2.3 **Analytics, institutional effectiveness, and reporting domain**

University operations require the integration of data from across various domains for analysis, evaluation of effectiveness, and to support required reporting. Some data may originate with the integrated system, while considerable portions are likely derived from other data sources. Data stewardship, for practical reasons, is assigned to the resulting integration where possible. These data stewards are responsible for the transformation, integration, and added value within the new, integrated domain of data. They must also have understandings in place with the data stewards of any originating data for the accuracy and protection of the data. Data stewards within this domain are responsible for the data administration of the

transformations and integration processes, as well as for data administration of any data originating in this domain. Responsibility to address questions and corrections about the originating data continues to reside with the data stewards in those domains.

2.3.1 Institutional assessment subdomain

Assessment and evaluation of the administrative effectiveness of the university is a distributed responsibility. Data may reside in many of these distributed areas. Assessment also has components of centralized responsibility. Access to central systems for data, including WeaveOnline, along with the data definitions, and access control are housed with the Office of Assessment and Evaluation. Since all portions of the university have an administrative component, data administration at the trustee level is shared between the provost and the chief financial officer. See also Section 2.8.2 for specific application to academic program assessment.

Keywords: SACS, SCHEV, accreditation

Data trustee	Thanassis Rikakis, Executive Vice President and Provost Dwight Shelton, Vice President for Finance and Chief Financial Officer
Data steward	Steven Culver, Assistant Provost for Assessment and Evaluation

2.3.2 Institutional planning, effectiveness, and external reporting subdomain

This subdomain engages in institutional planning and effectiveness, executive decision support, and external reporting.

Data trustee	Thanassis Rikakis, Executive Vice President and Provost
Data steward	Kris Bush, Assistant Provost, Institutional Research and Effectiveness

2.3.3 Enterprise GIS subdomain

One form of data integration adds the value of location and permits evaluation of many spheres of data within the university's geographic information system (GIS). While data may originate from any data domain (including academic and research areas), the foundational structure of the Enterprise GIS service consists of data related to the core of physical infrastructure and facilities/ building data.

Data trustee	Sherwood Wilson, Vice President for Administration
Data steward	Chris Kiwus, Associate Vice President and Chief Facilities Officer
Data expert	Seth Peery, Senior GIS architect, Enterprise GIS, Information Technology

2.4 Financial data domain

The financial data domain includes the breadth of budgeting and financial data. Several subdomains are involved.

2.4.1. Financial transactions, summary data subdomain

Every university operating department has a need for access to their own financial transactions, including summary data on those transactions. Data administration resides with the University Controller for access permissions, quality, definitions, and all aspects of data stewardship.

Keywords: budget, expenditures, accounts payable, accounts, funds, payroll, withholding, banking, direct deposit

Data trustee	M. Dwight Shelton, Vice President for Finance and Chief Financial Officer
Data steward	Ken Miller, Assistant Vice President for Finance and University Controller
Data experts	Leisa Shelor, Payroll Manager, and Wendell Vest, Associate Controller, Accounting Operations

2.4.2. Accounts receivable subdomain

Accounts receivable subdomain includes the arena of the University Bursar, and the accounts receivable functions. Accounts receivable also includes those areas that have been granted the authority to operate their own accounts receivables systems to better integrate with their service offerings. (Also see section 2.7.9 for student accounts receivable).

Data trustee	M. Dwight Shelton, Vice President for Finance and Chief Financial Officer
Data steward	Melinda West, University Bursar

2.4.3 Purchasing subdomain

While much of the enterprise data associated with buying goods and services appears as financial transactions (Section 2.4.1), unique purchasing data reflects the specific items purchased by vendor, as well as information about the procurement processes and associated documents (contracts, RFPs, etc.).

Data trustee	M. Dwight Shelton, Vice President for Finance and Chief Financial Officer
Data steward	Mary Helmick Director of Procurement
Data experts	Bonnie Sutphin, Associate Director for Operations, Procurement Department Patty Branscome, Director, Information Technology Contract Management

2.4.4 Hokie Passport subdomain

The Hokie Passport Services controls the data associated with the issuance and activity of Hokie Passport cards.

This standard is a part of the implementation of University Policy 7100

Data trustee	M. Dwight Shelton, Vice President for Finance and Chief Financial Officer
Data steward	Joseph Griffiths, Director, Hokie Passport Services

2.4.5 Sponsored Programs subdomain

The Office of Sponsored Programs (OSP) controls financial activity associated with externally sponsored grants and contracts of the university, university various funds and Virginia Tech Foundation funds transferred to the university to be expended. OSP handles all the billing, collection efforts, and letter of credit drawdown activity for the university's research portfolio.

Data trustee	Theresa Mayer, Vice President for Research and Innovation
Data steward	Martin Daniel, Associate Vice President for Research Operations
Data expert	Neil Sedlak, Sr. Director for Information Technology

2.5 **Human resources data domain**

Data on personnel recruitment, applications, hiring, employment, compensation, benefits and deductions, employee relations, disability data, compliance, and other personnel-related data fall in this domain.

Multiple subdomains apply because personnel policies of the university are overseen by distinct areas. For significant portions of the subdomains, common data definitions and many common policies apply, and coordination between the subdomains is essential. General questions about human resources should be directed to the Office of Human Resources. Human Resources houses the data expert for all the areas' use of the enterprise resource systems (Banner; PeopleAdmin).

2.5.1. Staff and administrative/professional (AP) faculty subdomain

This subdomain administers data pertaining to university staff, classified staff, AP faculty—whether on wages or salary, and to general definitions of human resources data.

Keywords: salaries, benefits, ADA, employee relations, compliance, applicants, lecturer

Data trustee	Sherwood Wilson, Vice President for Administration
Data steward	Lisa Wilkes, Associate Vice President for Administration

2.5.2. Teaching and research (T&R) faculty subdomain

The T&R faculty includes faculty members who are tenured, tenure-track, continuing appointment, continuing appointment track, and instructional. Also included in this domain are teaching faculty employees on wage (P14) appointments. Data administration is shared between the Office of the Provost and Human Resources. Data elements under the stewardship of the provost's area include data on tenure and continuing appointments, rank, the various honorifics conferred on T&R

This standard is a part of the implementation of University Policy 7100

faculty and retired T&R faculty, and other data elements requiring approval of the Board of Visitors, along with self-reported faculty activity data.

Data trustee	Thanassis Rikakis, Executive Vice President and Provost
Data steward	Jack Finney, Vice Provost for Faculty Affairs

This subdomain also includes data on course evaluations. Stewardship for this domain is handled as has been agreed below:

Data trustee	Thanassis Rikakis, Executive Vice President and Provost
Data steward	Steven Culver, Assistant Provost for Assessment and Evaluation

Data administration for descriptions of employment and associated data elements fall to the data stewardship within the Office of Human Resources, as does basic demographic data (See Section 2.2.3.4):

Data trustee	Thanassis Rikakis, Executive Vice President and Provost
Data steward	Lisa Wilkes, Associate Vice President for Administration

2.5.3. Research faculty subdomain

Research faculty are appointed as research associates, research scientists, senior research associates, senior research scientists, postdoctoral associate, project associate, senior project associate, or project director. They may also be appointed as research assistant professor, research associate professor, or research professor. Data administration is shared between the Office of the Vice President for Research and Human Resources. Data elements under the stewardship of the vice president's area include data on rank, personnel evaluations, grievances, data elements requiring approval of the Board of Visitors, along with self-reported faculty activity data.

Employment data for these individuals is administered by these roles:

Data trustee	Theresa Mayer, Vice President for Research and Innovation
Data steward	Sandra Muse, Senior Director for Research Faculty Initiatives

Data administration for descriptions of employment and associated data elements fall to the data stewardship within the Office of Human Resources, as does basic demographic data (See Section 2.2.3.4):

Data trustee	Theresa Mayer, Vice President for Research and Innovation
Data steward	Lisa Wilkes, Associate Vice President for Administration

2.5.4. Graduate assistantships subdomain

Keywords: graduate assistant, graduate teaching assistant, graduate research assistant

This standard is a part of the implementation of University Policy 7100

Data trustee	Karen DePauw, Vice President and Dean for Graduate Education
Data steward	Monika Gibson, Director, Student Services

2.6 Physical assets data domain

University physical assets data, including information on capital and fixed assets, includes information on the assets themselves as well as the processes involved.

Keywords: buildings, leases, parking, capital assets, roadways, heating infrastructure

2.6.1 Fixed assets subdomain

This subdomain includes university land and buildings, as well as equipment. Equipment inventory is an important element of the data under the stewardship in this subdomain.

Data trustee	M. Dwight Shelton, Vice President for Finance and Chief Financial Officer
Data steward	Ken Miller, Assistant Vice President for Finance and University Controller

2.6.2 Facilities subdomain

Facilities subdomain includes routine maintenance and improvement activities required to keep fixed assets in good condition, including custodial services, building and grounds maintenance, utilities, engineering, and construction and renovations.

Data trustee	Sherwood Wilson, Vice President for Administration
Data steward	Chris Kiwus, Associate Vice President and Chief Facilities Officer

2.6.3 Transportation subdomain

The transportation subdomain includes data pertaining to both the physical assets and the operations of transportation-related processes, from parking, to air transportation, and fleet services.

Data trustee	Sherwood Wilson, Vice President for Administration
--------------	--

2.7 Student data domain

Student-related data constitutes a significant part of university data, and has a multi-faceted structure.

2.7.1 Admissions subdomain

Applications to university programs are handled by four areas, each with its own stewardship responsibilities. Collectively, the admissions offices are responsible for the definitions of data used in the processes, with significant data elements commonly defined among the areas. Because of the different oversight responsibilities, data trustees and stewards are designated for each of the areas. Any need for escalation of issues would fall to Thanassis Rikakis, Executive Vice President and Provost.

Keywords: applicants, recruits, admission, graduate, professional, 2-year, undergraduate

2.7.2. Undergraduate admissions subdomain

Data trustee	Wanda Hankins Dean, Vice Provost for Enrollment and Degree Management
Data steward	Mildred Johnson, Associate Vice Provost, Enrollment Management and Director, Undergraduate Admissions

2.7.3 Graduate admissions subdomain

Data trustee	Karen DePauw, Vice President and Dean for Graduate Education
Data steward	Janice Austin, Director of Graduate Admissions and Academic Progress

2.7.4 Veterinary Medicine admissions subdomain

Data trustee	Cyril R. Clarke, Dean, Virginia-Maryland Regional College of Veterinary Medicine
Data steward	Jacquelyn Pelzer, Director of Admissions and Student Services.

2.7.5 Agricultural Technology admissions subdomain

Data trustee	Alan Grant, Dean, College of Agriculture and Life Sciences
Data steward	Pavli Mykerezi, Director, Agricultural Technology Two-Year Program

2.7.6 Enrollment subdomain

Students' registration and enrollment data, programs being pursued and changes, grades, holds, and related information are under the key stewardship of the University Registrar.

Keywords: registration, drop/add, course requests

Data trustee	Wanda Hankins Dean, Vice Provost for Enrollment and Degree Management
Data steward	Rick Sparks, University Registrar

2.7.7 Graduate program-specific data subdomain

Graduate program data about individual students includes graduate plan of study data, students' graduate committees and advising data, and data about individuals' theses/dissertations all pertain to this subdomain.

This standard is a part of the implementation of University Policy 7100

Data trustee Karen DePauw, Vice President and Dean for Graduate Education
Data steward Janice Austin, Director of Graduate Admissions and Academic Progress

2.7.8 Financial aid subdomain

Financial aid data includes information about students applying for and being awarded financial aid, as well as process-oriented data. See also student accounts receivable (Bursar), the data steward for financial aid disbursements.

Keywords: scholarships, work-study, FAFSA (also see Virginia Tech Foundation; graduate assistantships; Bursar)

Data trustee Wanda Hankins Dean, Vice Provost for Enrollment and Degree Management
Data steward Beth Armstrong, Director, University Scholarships and Financial Aid

2.7.9 Student accounts receivable subdomain (See Section 2.4.2.)

Keywords: tuition, fees, bills, fines, tuition remission, financial aid disbursement

Data trustee M. Dwight Shelton, Vice President for Finance and Chief Financial Officer
Data steward Melinda West, University Bursar

2.7.10 Student life subdomain

Areas included here are student medical and counseling data; housing and dining data, including assignments of student housing; recreational sports data; and student activities data. This arena also has data administration responsibilities for guests (e.g., summer programs) using student life facilities.

Keywords: alcohol abuse prevention, career services, counseling center, corps of cadets, dean of students, dining services, fraternities and sororities, health services, housing and residence life, international center, multicultural programs, recreational sports, student conduct, student disability services, student centers and activities

Data trustee Patty Perillo, Vice President for Student Affairs
Data steward Lee Hawthorne, Chief of Staff, Division of Student Affairs

2.7.10.1 *Protected health information of students*

FERPA-protected health information for students is handled by Athletics, Schiffert Health Center and by the Cook Counseling Center.

Data stewards Kanitta Charoensiri, Director, Schiffert Health Center
 Christopher Flynn, Director, Cook Counseling Center
 Susan Angle, Director, Services for Students with Disabilities

2.8 Academic program data domain

This domain includes the structure and content of academic programs. [For information about majors and other programs of specific students, see the enrollment subdomain in the student domain—Section 2.7.6.]

2.8.1 Curriculum subdomain

Curricular structure is divided into three areas—undergraduate, graduate, and veterinary medicine. Curriculum includes degrees, programs, majors, minors, concentrations, and related data, including the approval process for the curriculum.

Keywords: program, curriculum, Commission on Graduate Studies and Policies, Commission on Undergraduate Studies and Policies, degree requirements, SCHEV

Data trustee	Thanassis Rikakis, Executive Vice President and Provost
Data expert	Rick Sparks, University Registrar

2.8.2 Academic program assessment and evaluation subdomain

Assessment and evaluation of the curricular programs of the university is a distributed responsibility. Data may reside in many of these distributed areas. Assessment involves access to central systems for data, along with the data definitions, and access controls are managed by the Office of Assessment and Evaluation.

Keywords: SACS, SCHEV, accreditation

Data trustee	Thanassis Rikakis, Executive Vice President and Provost
Data stewards	Steven Culver, Interim Director, Office of Assessment and Evaluation

2.8.3 Timetable subdomain

Data on courses and sections offered in a given academic term (timetable information) are administered in this subdomain.

Data trustee	Thanassis Rikakis, Executive Vice President and Provost
Data steward	Rick Sparks, University Registrar

2.9 Threat assessment domain

The inter-organizational threat assessment team works to determine if an individual poses, or may reasonably pose, a threat of violence to self, others, or the Virginia Tech community and to intervene to avert the threat and maintain the safety of the situation.

Data trustee Kevin Foust, Chief of Police and Director of Security
Data expert Chassidy Tuell, Threat Assessment Team Coordinator

2.10 Occupational health and safety data domain

Occupational health and safety compliance data, environmental compliance, ergonomics, and lab safety are among the elements in this domain.

Keywords: environmental, occupational, ergonomics, lab safety, hazardous materials

Data trustee Sherwood Wilson, Vice President for Administration
Data steward Lance Franklin, Assistant Vice President, Environmental Health and Safety

2.11 Public safety data domain

Public safety compliance data, policing, crime, and fire data are among the elements in this domain.

Keywords: policing, crime, fire

Data trustee Sherwood Wilson, Vice President for Administration
Data steward Kevin Foust, Chief of Police and Director of Security

2.12 Alumni data domain

Information collected or generated after an individual has graduated and in relationship to alumni activities are included here, including chapter participation, reunions, interest groups, and other alumni affairs activities.

Data trustee Charles Phlegar, Vice President for Advancement
Data steward Matthew Winston, Senior Associate Vice President for Alumni Relations

2.13 Development data domain

Development data includes campaign data, gift and pledge data, and donor and prospect data.

Data trustee Charles Phlegar, Vice President for Advancement
Data steward Rhonda Arsenaault, Associate Vice President for Advancement Services

2.14 Computing infrastructure and security data domain

Network operations data, computing systems plant and operations data, information technology security data; help desk operations data, online copyright compliance data, enterprise personal digital identities data, and university-assigned communications identifiers (email addresses, messaging addresses, university telephone numbers, etc.).

Data trustee Scott F. Midkiff, Vice President for Information Technology and Chief Information Officer

One of the areas for which university departments may seek definitions is in the area of personal digital identities:

Data steward Karen Herrington, Director, Identity Strategy Administration

Assignment of university phone numbers and e-mail addresses is the responsibility of Network Infrastructure and Services.

Data steward William Dougherty, Executive Director, Network Infrastructure and Services

For other data stewards in other areas of Information Technology, refer to the data trustee.

2.15 Diversity and inclusion data domain

This area includes data on education and programming.

Data trustee Menah Pratt-Clarke, Vice President for Strategic Affairs, Provost Office

2.16 University Libraries data domain

Operational information unique to University Libraries is included here, including circulation and related information.

Data trustee Tyler Walters, Dean, University Libraries

2.17 Research data domain

Keywords: research proposals, research grants, research awards, research compliance, sponsored programs, research contracts

Included are research compliance data; proposal and award data

This standard is a part of the implementation of University Policy 7100

Data trustee	Theresa Mayer, Vice President for Research and Innovation
Data steward	Martin Daniel, Associate Vice President for Research Operations
Data expert	Neil Sedlak, Sr. Director for Information Technology

2.18 Virginia Cooperative Extension and Virginia Agricultural Experiment Stations (Agency 229) data domain

Program information about Virginia Cooperative Extension and the Agricultural Experiment Station is managed in the College of Agriculture and Life Sciences.

Keywords: agriculture, natural resources, family and consumer services, 4-H, community viability, College Farm, AREC

Data trustee	Alan Grant, Dean, College of Agriculture and Life Sciences
Data steward	Edwin J. Jones, Director, Virginia Cooperative Extension and Dr. Saied Mostaghimi, Director of Agricultural Experiment Station

2.19 Outreach data domain

Data on programming through outreach and international affairs includes information on programs at the Steger Center in Switzerland, Commonwealth Campus Centers, Upward Bound/Talent Search, and many others. Data on the specific facilities is in the facilities domain (and some in the Virginia Tech Foundation domain).

Keywords: Global Education Office, Continuing and Professional Education, Talent Search, Upward Bound, Language and Culture Institute, Inn at Virginia Tech and Skelton Conference Center, Center for Student Engagement and Community Partnerships, International Support Services

Data trustee	Guru Ghosh, Vice President for Outreach and International Affairs
Data steward	Scott Farmer, Director, Outreach Information Services

2.20 Athletics data domain

This domain includes information about intercollegiate athletic programs, as well as selected information about student athletes. (For data relative to intramural sports, see the Student Life subdomain.)

Keywords: NCAA, compliance, ACC

Data trustee	Whit Babcock, Director of Athletics
--------------	-------------------------------------

2.21 Virginia Tech Foundation

The Foundation's information is separate from university data and is managed under an agreement between the two parties. The data in this domain includes university endowment financial data including endowed scholarships and professorships as well as trusts, agency and operating funds. It should be noted that the Foundation is not involved in fund raising (see section 2.1.3 Development Data Domain) nor is it involved in the application and awarding of financial aid (see section 2.7.8 Financial Aid Domain).

This standard is a part of the implementation of University Policy 7100

Keywords: private, VTF, Hotel Roanoke, Virginia Tech Corporate Research Center, WVTF, the Center for European Studies and Architecture, Pete Dye River Course, gifts

Data trustee
Data steward

John Dooley, Chief Executive Officer and Secretary-Treasurer
Terri Mitchell, Associate Vice President for Administration and Controller

3 Areas not listed

Questions or concerns about university data areas not covered above may be directed to the vice president with oversight for the specific area, or directed to Information Technology at info.tech@vt.edu for clarification.

Further, data limited to use in only one department and not entered into central university databases is managed by that department. The department head is the data trustee and questions should be directed to that person, or to the data steward named by the department head. Examples of such data could include data definitions that are used in discipline-based groups (specialties of faculty, enrollments in branches of knowledge within the discipline), or operational data such as assignment of work space.

5 Definitions

Data trustees are senior university officials who have planning and policy-making responsibilities for university data.

Data stewards oversee the capture, maintenance, and dissemination of data for a particular operation, and are appointed by the respective data trustee.

Data experts are operational managers in a functional area with day-to-day responsibilities for managing business processes and establishing the business rules for the production transaction systems.

6 Revisions and Approval

Approved, Vice President for Information Technology and Chief Information Officer, Earving L. Blythe,
March 29, 2011

Revision June 2012

Updates to names; updates to position and organization titles

Section 2.3, Analytics, institutional effectiveness, and reporting domain, collects information previously scattered in different sections, and outlines the relationships required in data domains that significantly derive information from other domains. The enterprise GIS data set has been added to this domain.

Revision November 2013

Updates to names; updates to position and organization titles

Revision November 2015

Updates to names, position and organization titles; removal of duplicate section (formerly 2.5.4 Non paid affiliates).

Revision February 2016

Updates to names, position and organization titles.

Approved, Vice President for Information Technology and Chief Information Officer, Dr. Scott F. Midkiff, February 18, 2016

Revision January 2017

Updates to names, position and organization titles.

Approved, Vice President for Information Technology and Chief Information Officer, Dr. Scott F. Midkiff, January 23, 2017
