Design

# VT Alerts Overview

»ENS Philosophy: What, where, what to do?

# VT Alerts Delivery Modes

---

## **Automatic Alert Channels**

- » Virginia Tech Homepage
- » Electronic Message Boards
- » Virginia Tech (@vt.edu) emails
- » Annunciators (Fire Alarms)
- » Campus sirens

## **Opt-in Alert Channels**

- » VT Phone Alerts
- » Text/SMS
- » Non-Virginia Tech email
- » Voice calls
- » VT Desktop Alerts
- » Social Media

# Improvements

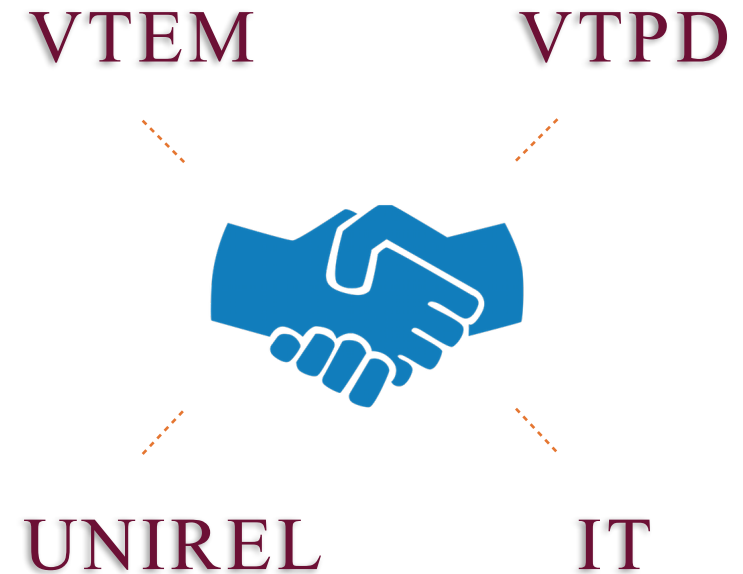

# Collaboration

## Public Safety Collaboration Group

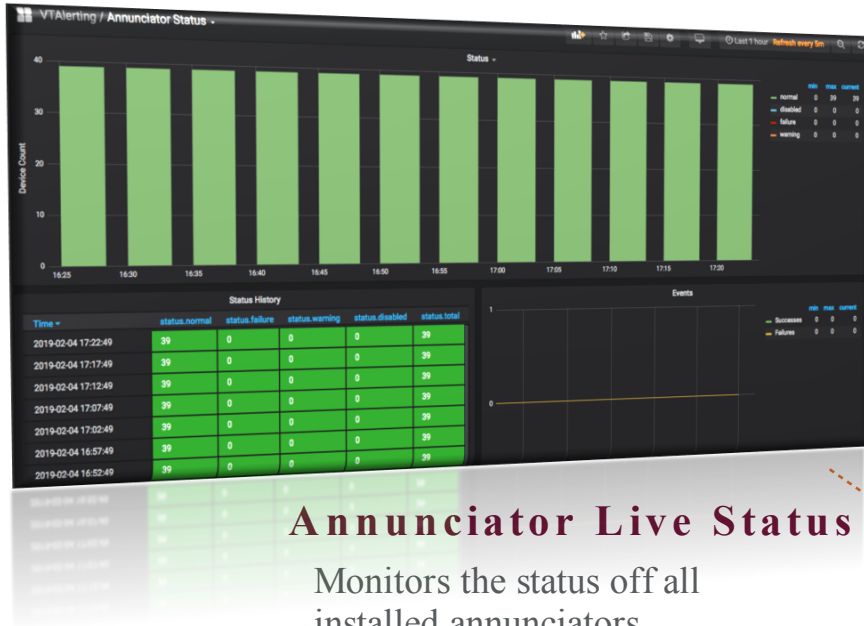

Recognition that service has 2  
components (equally important):

- ✓ IT recognizes technical needs
- ✓ Public Safety prioritizes items

- **Shared vision/mission:**
  - Ensure proper life safety system
  - Explore what is possible together

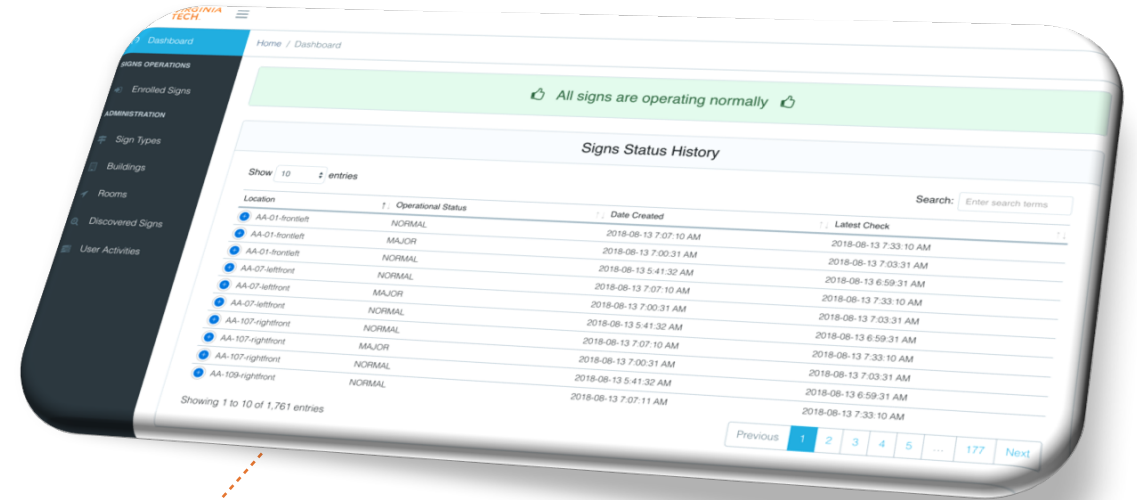

# VT Alerts Dashboards

## Annunciator Live Status

Monitors the status off all installed annunciators

## Message Board Live Status

Monitors the status off all installed message boards

## Applications Live Status

Monitors all applications in the VT Alerts Portfolio

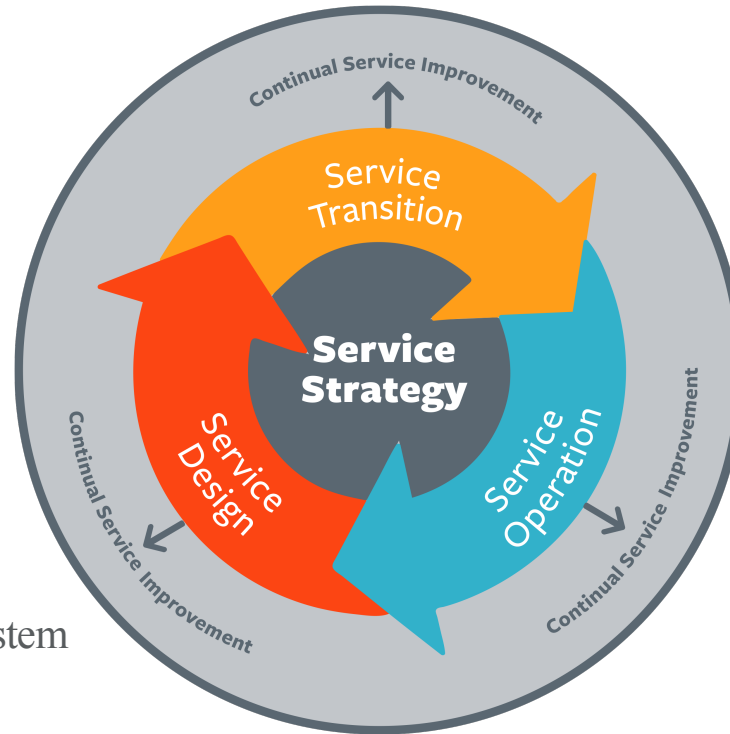

# Sustainable Support

## New Monitoring Capabilities

- Infrastructure
- Applications
- Devices

## Service Management

- Long term operation of the system
- Changing environment

## Improved Redundancy for each channel

- Physical Layer
- Network Layer
- Application Layer

## Channel Development

- Scope
- Scale

*It is important to be proactive instead of reactive in public safety.*

# 「New Channels

# Message Board Channel

---

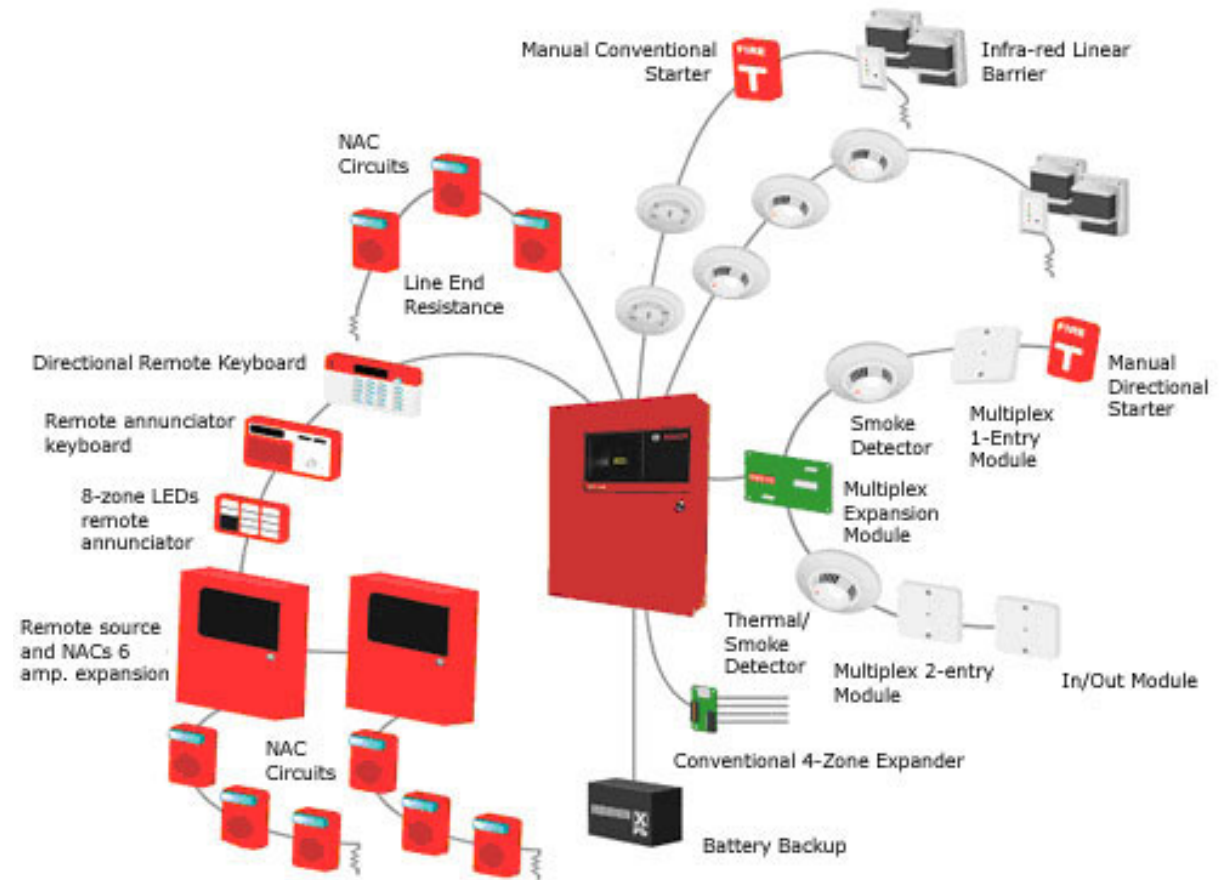

## ❖ Next Generation boards

- ❖ Reliability (SSH security)
- ❖ High visibility LED display with anti-glare coating
- ❖ LED light and speaker call attention to the display when a message is playing
- ❖ Direct connect to text messaging providers

# Annunciator Channel

## ➤ Audio Notifications

- Based on CAP\* protocol
- Entire buildings
- Larger range than boards
- Cost effective
  - 1 building ~ 1 board

\*Common Alerting Protocol

# Annunciator Roadmap

## Infrastructure

- ✓ Server and Network Improvements
- ✓ Redundancy / Back up

## Phase 1

- ✓ Proof of concept
- ✓ Initial 8 Annunciators

## Phase 2

- ✓ 23 new Annunciators
- ✓ + 4 building renovations

## Enhancements

- Custom Settings
- Weather Alerts
- Remote Sites
- Further Redundancy

**Total: 35 Annunciators installed across the university.**

# Upcoming

# Subscribe Alerts

OPPORTUNITIES FOR IMPROVEMENT

## Release

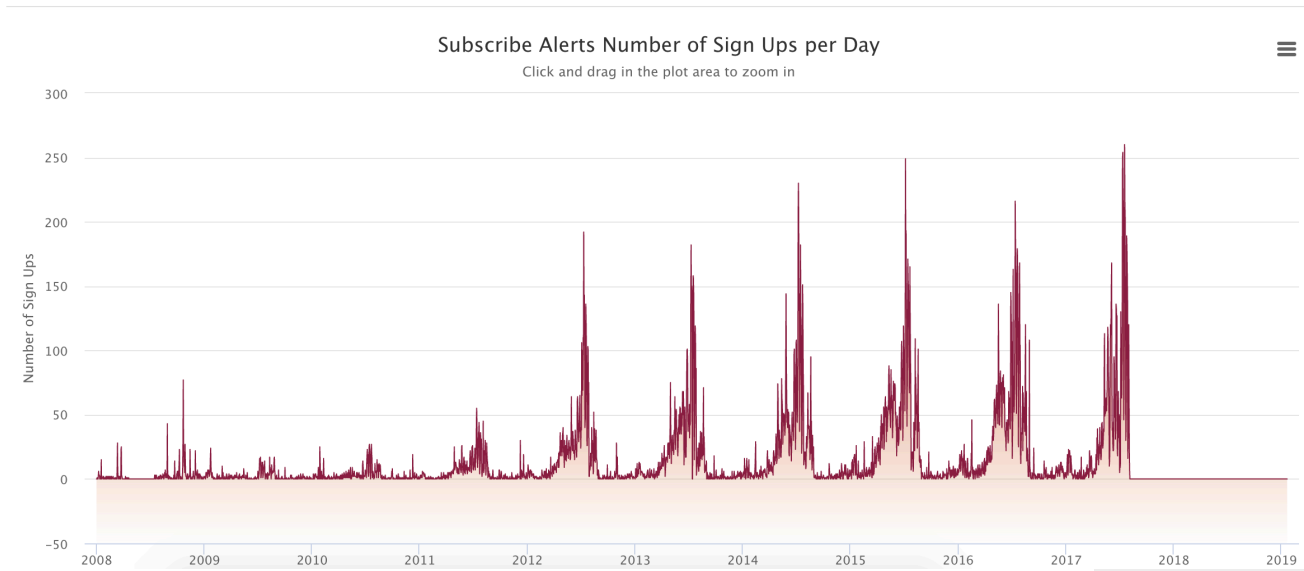

# Subscribe Alerts 2019 Release

\* pre-production images

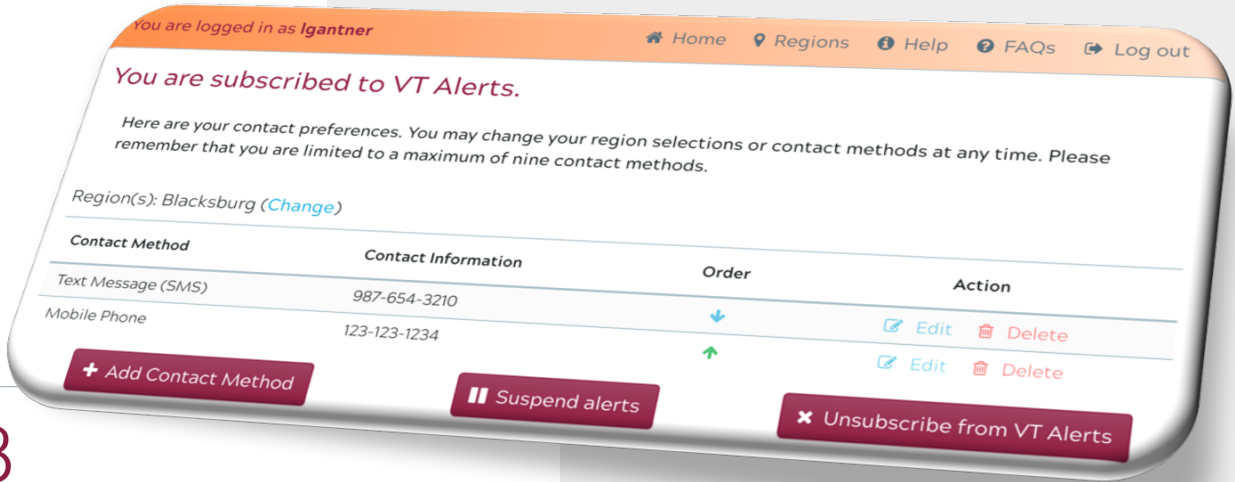

## Management Interface Configuration & Operation

55,918

## Guest Alerts Application User Self Service & Administration

# Digital Signage

## Collaboration

- Locate and validate signage
  - Which signs should be included?
- Enable signs to receive VT Alerts
  - Social Media (Twitter, Facebook, etc.)
  - Desktop Alerts
  - New Application / Channel

**1st floor**

**2nd floor**

**Lower Level**

**Entrance**

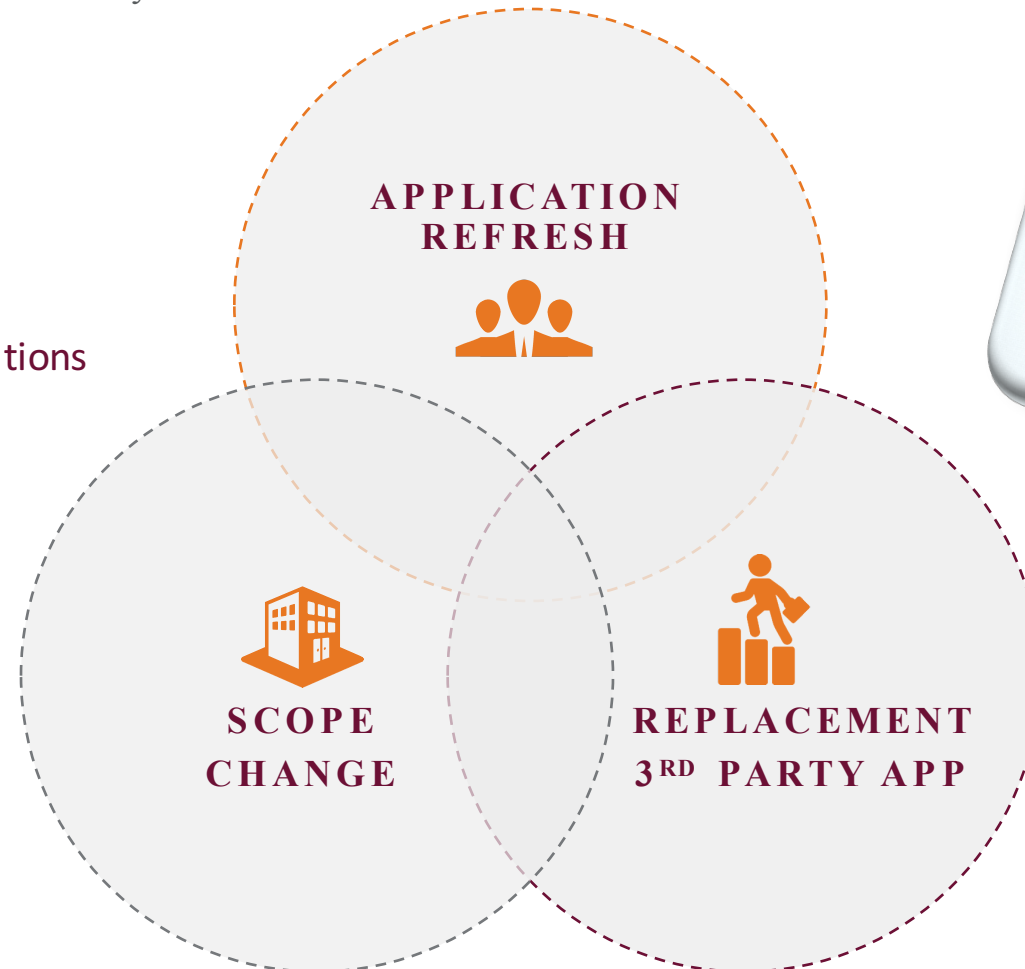

# Email Channel

UONS  
University Online Notification System

## Use Cases

- VT Alerts
- Daily Emails
- Timely Notifications

「Questions?

# Thank You !

## Questions & Answers

- »Conference Session
- »Date/Time - March 1<sup>st</sup> 2-3pm
- »Zoom Link: <https://virginiatech.zoom.us/j/296495345>

## Takeaway Messages

- »It is important to be proactive instead of reactive.
- »Watch for new Message Boards.
- »Listen for new Annunciators.
- »Subscribe to VT Alerts.
